WALK-AROUND

OUTSTANDING PRODUCTIVITY & FUEL ECONOMY

Innovative SIGMADOZER reduces digging resistance and smoothly rolls material up for increased blade loads.

Blade capacity **5.6 m³ 7.3 yd³** (for EX)
5.9 m³ 7.7 yd³ (for WX) See page 4.

Automatic transmission with lockup torque converter improves fuel consumption. See page 5.

SAA6D114E turbocharged after-cooled diesel engine provides an output of **155 kW 207 HP** with excellent fuel economy. This engine is EPA Tier 3 and EU stage 3A emissions certified. See page 6.

Hydraulic drive radiator cooling fan controlled automatically, reduces fuel consumption and operating noise levels. See page 6.

Gull-wing engine side covers for easy and efficient engine servicing
See page 9.

Blade tilt lines completely protected

PLUS (Parallel Link Undercarriage System) provides longer wear life and lower repair & maintenance costs with new rotating bushings and other key enhancements. See page 9.

PAT (Power Angle and Tilt Dozer) expands productivity in a variety of applications. The manually adjustable blade pitch further expands versatility and productivity. See page 8.

Complete operator control with PCCS (Palm Command Control System)

- Electronic controlled PCCS travel control
- Hydraulic controlled PCCS blade/ripper control
- Fuel control dial
- Automatic/manual gearshift selectable mode
- Gearshift pattern preset function
- ECMV controlled transmission

See page 7.

Increased-track length for EX/WX

ensures outstanding grading ability and stability.

Extra-low machine profile

provides excellent machine balance and low center of gravity.

Modular power train for increased serviceability and durability. Forward mounted pivot shafts isolate final drives from blade loads. See page 9.

Wet, multiple-disc brakes adjustment free for excellent service life. See page 9.

PRODUCTIVITY & FUEL ECONOMY FEATURES

New fuel efficient bulldozer

The new D65 has achieved both high levels of productivity and fuel economy through the usage of SIGMADOZER and automatic transmission with lockup torque converter. SIGMADOZER developed based on completely new digging theory dramatically increases production. New transmission with high power transmission efficiency greatly reduces fuel consumption. This bulldozer significantly improves fuel efficiency compared with our conventional model.

SIGMADOZER	PRODUCTION: 15% increase	FUEL EFFICIENCY: 25% increase <i>(Compared with our conventional model)</i>
Automatic transmission with lockup torque converter	FUEL CONSUMPTION: 10% decrease	

Outstanding productivity

SIGMADOZER – The next generation blade

Based on a completely new digging theory, SIGMADOZER dramatically improves dozing performance and increases productivity. A new frontal design concept adopted for digging and rolling up at the center of the blade increases soil holding capacity while simultaneously reducing sideways spillage. It also reduces digging resistance producing a

Production increased by 15%
(compared with our conventional model)

smoother flow of earth, enabling the dozing of larger quantities of soil with less power.

SIGMADOZER (D65-16)

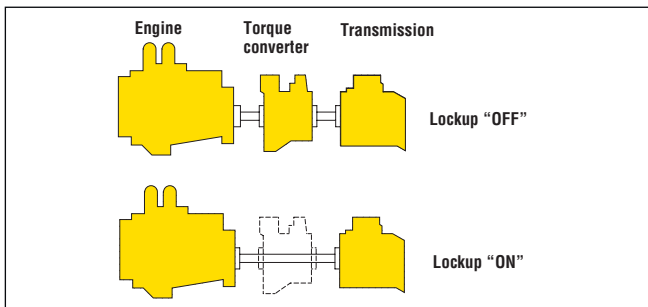

Straight tilt blade (D65-15E0)

Outstanding fuel economy

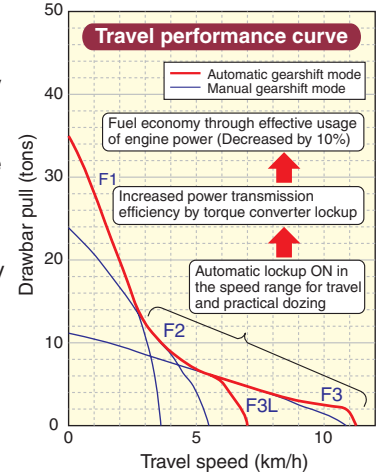

Automatic transmission with lockup torque converter

A sharp reduction in fuel consumption and greater power train efficiency is achieved by the new automatic gearshift transmission and lockup torque converter. The automatic transmission selects the optimal gear range depending on the working conditions and load placed on the machine. This means the machine is always operating at maximum efficiency.

Fuel consumption decreased by 10%
(compared with our conventional model)

Lockup mechanism of the torque converter is automatically actuated to transfer engine power directly to the transmission in travelling and usual dozing speed ranges. Locking up the torque converter eliminates loss of power by 10%. Because the electronically controlled engine is extremely efficient, a decrease in fuel consumption is realized while also maintaining machine power.

Automatic/manual gearshift selectable mode

Automatic or manual gearshift modes can be selected with ease to suit the work at hand by simply pressing the switch on the multi-monitor (selection at neutral).

- **Automatic gearshift mode**

Select for all general dozing. When a load is applied, the transmission automatically shifts down, and when the load is off, it automatically shifts up to a set maximum gear speed. This mode economizes both fuel and production further where the torque converter lockup mechanism is actuated according to load, providing a one to one drive.

- **Manual gearshift mode**

Select for dozing and ripping rough ground. When loaded, the transmission automatically shifts down, but does not shift up when the load is off.

Selectable working mode

Working mode P is the mode aiming for powerful operation and maximum production and mode E for general dozing applications with adequate speed and power while saving energy. For CO₂ reduction and energy saving, the monitor panel allows for switching the working mode with ease, depending on the work at hand.

- **P mode (Power mode)**

With P mode, the engine outputs its full power, allowing the machine to perform the work requiring large production, heavy-load work, and uphill work.

- **E mode (Economy mode)**

With E mode, the engine outputs enough power for the work without delivering unnecessary power. This mode allows for energy saving operation and is suitable for the work on a ground where the machine may cause shoe slip and the work not requiring large power such as downhill dozing, leveling and light-load work.

ECOLOGY FEATURES

Komatsu develops and produces all major components, such as engines, electronics and hydraulic components in house.

Since all components can be matched, efficiencies are increased achieving high levels of productivity and ecology. With this "Komatsu Technology", and adding customer feedback, Komatsu is achieving great advancements in technology.

The result is a new generation of high performance and environment friendly machines.

Engine

Fuel efficient electronic controlled engine

The Komatsu SAA6D114E engine delivers **155 kW** 207 HP at 1950 rpm. The fuel-efficient, powerful Komatsu engine makes the D65 superior in both ripping and dozing operations. The engine is EPA Tier 3 and EU stage 3A emissions certified. The engine is turbocharged and features direct fuel injection and air-to-air aftercooling to maximize power, fuel efficiency and emission compliance. To minimize noise and vibration, the engine is mounted to the main frame with rubber cushions.

Hydraulic drive radiator cooling fan

The engine cooling fan rotation speed is electronically controlled. The fan rotation speed depends on engine coolant and hydraulic oil temperatures, the higher the temperature the higher the fan speed. This system increases fuel efficiency, reduces the operating noise levels and requires less horsepower than belt driven fan.

CONTROL FEATURES

Human-Machine Interface PCCS (Palm Command Control System)

Komatsu's ergonomically designed control system "PCCS" creates an operating environment with "complete operator control."

Palm command electronic controlled travel joystick

Palm command travel joystick provides the operator with a relaxed posture and superb fine control without operator fatigue. Transmission gear shifting is simplified with thumb push buttons.

Palm command hydraulic controlled blade/ripper joystick

Hydraulically-controlled palm command joystick is equipped for blade/ ripper control. Combined with the highly reliable Komatsu hydraulic system, superb control is the result.

ECMV (Electronic Controlled Modulation Valve) controlled transmission

A controller automatically adjusts each clutch engagement depending on travel conditions, providing smooth shockless clutch engagement, improved component life and operator ride comfort.

Gearshift pattern preset function

When the gearshift pattern is set to either <F1-R2>, <F2-R1>, <F2-R2>, <F2-R3L> or <F3L-R3L> in the automatic gearshift mode, the gear automatically shifts to the preset gear when the travel control joystick is set to Forward or Reverse position, reducing round trip repetition work time and operator's efforts. Gearshift pattern <F2-R3L> and <F3L-R3L> are newly added for high speed leveling operation.

Hydrostatic Steering System—smooth, powerful turning

The engine power is transmitted to both tracks without power interruption on the inside track for smooth, powerful turns. Counter-rotation is available for minimum turning radius enhancing maneuverability.

WORKING ENVIRONMENT

New integrated ROPS cab

A newly designed cab is integrated with ROPS according to the latest computer analysis. High rigidity and superb sealing performance sharply reduce noise and vibration for the operator and prevent dust from entering the cab. Relaxed operation in comfortable environment. In addition, side visibility is increased because external ROPS structure and posts are not required. Outstanding visibility has been achieved.

Large multi-lingual LCD color monitor

A large user-friendly color monitor enables safe, accurate and smooth work. Excellent screen visibility is achieved by use of TFT liquid crystal display that can easily be read at various angles and lighting conditions. Simple and easy to operate switches. Plus function keys facilitate multi-function operations.

Display data in 10 languages to globally support operators around the world.

Comfortable ride with cab damper mounting

The D65's cab mount uses a cab damper which provides excellent shock and vibration absorption capacity. The long stroke cab damper mounts soften shocks and vibration while traveling over adverse conditions, which conventional rubber mounting systems are unable to absorb. The cab damper spring isolates the cab from the machine body, suppressing vibration and providing a quiet, comfortable operating environment.

Power angle power tilt dozer (Optional)

A power angle and power tilt dozer blade with highly durable box-structure frame is optionally available. This dozer is available for the EX, WX and PX machines. The hydraulic blade tilt and angling function expands versatility and productivity in a variety of applications. The manually adjustable blade pitch further expands the versatility and productivity.

MAINTENANCE FEATURES

Preventative maintenance

Preventative maintenance is the only way to ensure long service life from your equipment. That's why Komatsu designed the D65 with conveniently located maintenance points to make necessary inspections and maintenance quick and easy.

Multi-monitor with troubleshooting function to prevent critical machine troubles

Various meters, gauges and warning functions are centrally arranged on the multi-monitor. The monitor simplifies start-up inspection and promptly warns the operator with a lamp and buzzer if any abnormalities should occur. In addition, countermeasures are indicated in 4 levels to ensure safety and prevent the machine from major problems. Replacement times for oil and filters are also indicated.

Easy radiator cleaning with hydraulic drive fan

The radiator can be cleaned by utilization of the reversible, hydraulically driven cooling fan. The fan can be reversed from inside the cab by simply activating a switch.

Oil pressure check ports

Pressure check ports for power train components are centralized to promote quick and simple diagnosis.

Gull-wing engine side covers

The engine side covers are gull-wing type with a gas spring, and the opening angle of the cover is further increased to facilitate engine maintenance and filter replacement.

Low maintenance costs

Parallel Link Undercarriage System (PLUS) (Optional)

Komatsu's innovative Parallel Link Undercarriage System features a rotary bushing that demonstrates high durability in any working conditions. Allowing the bushing to rotate virtually eliminates bushing wear, resulting in doubled service life of the undercarriage when compared with the conventional undercarriage. In addition, wear limits of the link and carrier roller are increased to balance with the extended service life of the bushing.

Self-adjusting idler support

Self-adjusting idler support applies a constant spring force to the wear plate of the idler guide to eliminate the play of the idler. This results in reduced noise and vibration as well as extends the service life of the wear plate.

Reliable simple hull frame

Simple hull structure main frame design increases durability and reduces stress concentration at critical areas. The track frame has a large cross section and utilizes pivot shaft mounting for greater reliability.

Sealed DT connectors

Main harnesses and controller connectors are equipped with sealed DT connectors providing high reliability, as well as water and dust resistance.

Flat face O-ring seals

Flat face O-ring seals are used to securely seal all hydraulic hose connections preventing leakage.

Enclosed hydraulic piping

Hydraulic piping for the blade tilt cylinder is completely housed in the push arm, protecting it from damage.

Modular power train design

Power train components are sealed in a modular design that allows the components to be removed and installed without oil spillage, making servicing work clean, smooth and easy.

Adjustment-free disc brakes

Wet disc brakes are adjustment-free and provide excellent service life.

SPECIFICATIONS

ENGINE

Model Komatsu SAA6D114E-3
 Type 4-cycle, water-cooled, direct injection
 Aspiration Turbocharged, air-to-air aftercooled
 Number of cylinders 6
 Bore x stroke **114 mm x 135 mm** 4.49" x 5.31"
 Piston displacement **8.27 ltr** 505 in³
 Governor All-speed and mid-range, electronic
 Horsepower
 SAE J1995 Gross **155 kW** 207 HP
 (ISO 14396 Maximum Gross **163.7 kW** 219 HP)
 ISO 9249 / SAE J1349* Net **153 kW** 205 HP
 Rated rpm 1950 rpm
 Fan drive type Hydraulic
 Lubrication system
 Method Gear pump, force lubrication
 Filter Full-flow
 *Net horsepower at the maximum speed of
 radiator cooling fan **139 kW** 186 HP
 EPA Tier 3 and EU Stage 3A emissions certified.

TORQFLOW TRANSMISSION

Komatsu TORQFLOW transmission consists of a water-cooled, 3-element, 1-stage, 2-phase, torque converter with lockup clutch, and a planetary gear, multiple-disc clutch transmission which is hydraulically actuated and force-lubricated for optimum heat dissipation. Gearshift lock lever and neutral safety switch prevent machine from accidental starts.

Travel speed	Forward	Reverse
1st	3.6 km/h 2.2 mph	4.4 km/h 2.7 mph
2nd	5.5 km/h 3.4 mph	6.6 km/h 4.1 mph
3rdL	7.2 km/h 4.5 mph	8.6 km/h 5.3 mph
3rd	11.2 km/h 7.0 mph	13.4 km/h 8.3 mph

STEERING SYSTEM

PCCS lever controls for all directional movements. Pushing the PCCS lever forward results in forward machine travel, while pulling it rearward reverses the machine. Simply tilt the PCCS lever to left to make a left turn. Tilt it to the right for a right turn.

Hydrostatic Steering System (HSS) is powered by steering planetary units and a hydraulic pump and motor. Counter-rotation turns are also available. Wet, multiple-disc, pedal-controlled service brakes are spring-actuated and hydraulically released. Gear shift lock lever also applies parking brake.

Ground clearance . . . **.410 mm 1'4" (415 mm 1'4")**
() ... PLUS spec.

Dimension with Power angle power tilt dozer (D65EX-16) single grouser shoe.

OPERATING WEIGHT

Tractor weight:

Including ROPS cab, rated capacity of lubricant, hydraulic control unit, coolant, full fuel tank, operator, and standard equipment.

D65EX-16 **17120 kg** 37,740 lb (**17430 kg** 38,430 lb)
 D65PX-16 **18890 kg** 41,640 lb (**19210 kg** 42,350 lb)
 D65WX-16 **17860 kg** 39,370 lb (**18170 kg** 40,060 lb)

for PAT dozer

D65EX-16 **18030 kg** 39,750 lb (**18340 kg** 40,430 lb)
 D65PX-16 **18870 kg** 41,600 lb (**19210 kg** 42,350 lb)
 D65WX-16 **18900 kg** 41,670 lb (**19210 kg** 42,350 lb)

() ... PLUS spec.

Operating weight

Including SIGMADOZER (EX/WX) or straight tilt dozer (PX) or power angle power tilt dozer, ROPS cab, operator, standard equipment, rated capacity of lubricant, hydraulic control unit, coolant, and full fuel tank.

D65EX-16 **19510 kg** 43,010 lb (**19820 kg** 43,690 lb)
 D65PX-16 **20990 kg** 46,270 lb (**21310 kg** 46,980 lb)
 D65WX-16 **20360 kg** 44,880 lb (**20670 kg** 45,570 lb)

for PAT dozer

D65EX-16 **20990 kg** 46,270 lb (**21300 kg** 46,960 lb)
 D65PX-16 **21860 kg** 48,190 lb (**22200 kg** 48,940 lb)
 D65WX-16 **21890 kg** 48,260 lb (**22200 kg** 48,940 lb)

() ... PLUS spec.

STANDARD EQUIPMENT FOR BASE MACHINE

- Air cleaner, double element with dust indicator
 - Alternator, 60 ampere/24V
 - Backup alarm
 - Batteries, 140 Ah/2 x 12V
 - Color monitor
 - Decelerator pedal
 - Engine hood
 - Engine side covers, gull-wing
 - Fenders
 - High mount foot rests
 - Hydraulic drive radiator cooling fan with clean mode
 - Locks, filler caps and covers
 - Muffler with curved exhaust pipe
 - Oil pressure check ports for power train
 - Radiator mask, heavy-duty, hinged
 - Radiator reserve tank
 - Rear counterweight (EX, WX with PAT)
 - Rear cover
 - Seat, adjustable
 - Starting motor, 7.5 kW/24V
 - Steering system:
 - HSS (Hydrostatic Steering System)
 - Track roller guard, center and end section (PX)
 - Track roller guard, end sections (EX, WX)
 - Track shoe assembly
 - Heavy-Duty sealed and lubricated track
 - **510 mm** 20" single grouser shoe (EX)
 - **560 mm** 22" single grouser shoe (EX with PAT)
 - **760 mm** 30" single grouser shoe (WX)
 - **760 mm** 30" single grouser shoe (PX, WX with PAT)
 - **915 mm** 36" single grouser shoe (PX)
 - Underguards:
 - oil pan and transmission
 - heavy-duty
 - Water separator
 - ROPS cab*
 - Air conditioner
 - Air-conditioner intake precleaner
 - Cab accessories
 - 12V power supply
 - Cup holder
 - Rear view mirror
 - Sun visor
- * Meets ISO 3471, SAE J1040 APR88 ROPS standards, and ISO 3449 FOPS standard.

OPTIONAL EQUIPMENT

- Air suspension seat with turn, high-back
 - Alternator, 90 ampere/24V
 - AM-FM radio
 - Batteries 200 Ah/2 x 12 V
 - Engine intake precleaner
 - Front pull hook
 - Hinged underguards
 - Hitch type drawbar
 - Hydraulics for ripper (EX, WX)
 - Light working, cab additional
 - Rear view monitoring system
 - ROPS canopy
 - Rotary bushing link track (PLUS)
 - Starting motor 11.0 kW/24 V
 - Suspension seat with high-back
 - Tool kit
 - Track roller guard, full length
- Multi-shank ripper (for D65EX/WX):**
 Weight (including hydraulic control unit) **1770 kg** 3,900 lb
 Beam length **2170 mm** 7'1"
 Maximum lift above ground . . . **640 mm** 2'1"
 Maximum digging depth **590 mm** 1'11"

SHOES

Models	Shoe	Additional weight	Ground contact area	Additional ground pressure to tractor
D65EX	560 mm 22" single-grouser shoe	+130 kg (+130 kg) +290 lb (+290 lb)	33375 cm² (33265 cm²) 5,173 in ² (5,156 in ²)	-4.5 kPa (-4.7 kPa) -0.05 kg/cm ² (-0.05 kg/cm ²) -0.66 psi (-0.68 psi)
